 Bengaluru

## PROFESSIONAL SUMMARY

My core passion lies at the intersection of building and breaking. I get an incredible thrill from bringing a new, unique idea to life, but I'm equally fascinated by the process of deconstruction—pulling things apart to see what makes them tick, and more importantly, what makes them fail. This isn't about destruction, but about gaining a fundamental understanding that fuels true innovation. For me, competitions are the ultimate testing ground, a place where I can push my creations to their limits and prove that what I've built is not only novel but also resilient.

## EXPERIENCE

**Makes Sense - Founder**  
09/2025 - Present

- Serving as the primary engine for innovation, responsible for both the "what we build" and the "why we build it."

**Vindiata - Web Scraping Intern**  
04/2025 - Present

- Expanded data scraping capabilities and authored automation scripts using Python.
- Played a key role in performance tuning of scripts and servers.
- Contributed to a new system architecture for AI-driven data analysis.

**Mangal Deep Food Grains - Full-Stack Developer (Freelance)**  
Bengaluru • 03/2022 - 05/2022

- Developed and maintained key features for the company's e-commerce website and mobile application.
- Improved system reliability and shipped updates across the full technology stack to enhance user experience.

## ACCOMPLISHMENTS

- Detectron2 Discussion, Github, Provided a key solution for a complex prediction issue within the Detectron2 library.
- Open-Source Tooling, Github, Created and shared an extended feature for Detectron2 to convert instance segmentation masks to COCO JSON format.

## WEBSITE, PORTFOLIO AND PROFILES

- linkedin.com/in/daksh-rawal
- daksh.web.app/
- github.com/daksh47

## COMMUNITY SERVICE

**Stack overflow - Stack Overflow Contributor**

- Answered 35+ technical questions, helping developers solve real-world coding challenges.

**Github - Detectron2 Discussion**

- Provided a key solution for a complex prediction issue within the Detectron2 library.

**Github - Open-Source Tooling**

- Created and shared an extended feature for Detectron2 to convert instance segmentation masks to COCO JSON format.

## AWARDS

- 2Nd Place, Wort Und Macht ( National IT Fest, CHRIST University | Feb 2025 )
- 2Nd Place, Algol ( National IT Fest, CHRIST University | Feb 2025 )
- 1St Place, Coding ( Matrix 2k25, KLE Society's Degree College | March 2025 )
- 1St Place, Crackathon ( Tech Eniac, Surana College | March 2025 )
- 1St Place, Coding & Debugging ( Incognito, Seshadripuram College | March 2025 )
- 1St Place, IT Quiz ( Tech Eniac, Surana College | March 2025 )
- 2Nd Place, Web Designing ( Innovesta, Surana College | March 2025 )

## EDUCATION

**BMS COLLEGE OF COMMERCE & MANAGEMENT**  
09/2025

**BCA**

## SKILLS

- Problem-Solving
- Machine Learning
- Web Development
- Mobile App Development
- Automation & Scripting
- Web Scraping
- Debugging
- API Integration
- Software Testing
- Python
- JavaScript
- HTML/CSS
- React
- Java

## CERTIFICATIONS

- Google Cybersecurity Certificate, Coursera
